

JOE GODWIN

Full Stack Developer | AI-Powered Applications | Web Applications

Mumbai, India | +91 7977694497 | godwinjoe87@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFILE

As an Information Technology student, I genuinely enjoy turning ideas into working software. Coming from a technical background in Electronics & Telecommunication, I made a deliberate shift into IT and now build full-stack applications hands-on — frontend, backend, databases, authentication and APIs included. I like picking up new tools and solving practical problems, and I'm actively sharpening my Java, DSA and Spring Boot skills.

PROJECTS

TaskFlow — Full-Stack Productivity Platform (Individual Project)

[taskflow-productivity-one.vercel.app](#)

- Built a full-stack productivity platform for daily task scheduling, habit tracking, goals/routines and a Pomodoro focus timer, with an analytics dashboard visualizing user progress.
- Implemented user login/signup with JWT and bcrypt authentication and user-specific database storage, including a security-question-based account recovery mechanism for password resets.
- Delivered downloadable PDF productivity reports and a responsive UI; built with React/Vite, Node.js/Express and PostgreSQL (Neon) via Sequelize, deployed on Vercel and Render.

CivicSense-AI — AI-Powered Civic Issue Reporting Platform (Group Hackathon Project)

[civic-sense-ai-roan.vercel.app](#)

- Built a platform for citizens to report real-world civic issues such as drainage, flooding and electricity problems, with separate citizen, administrator and MP workflows.
- Enabled multimodal complaint submission via text, voice, images and location/map data (Google Maps API), helping administrators and MPs prioritize reported issues.
- Contributed to both frontend and backend development, integrating the Google Gemini API to help analyze citizen feedback.

TECHNICAL SKILLS

Programming: JavaScript, Java, SQL

Frontend: HTML, CSS, JavaScript, React, Vite, Tailwind CSS

Backend: Node.js, Express.js, Sequelize, JWT Authentication, Middleware

Databases: PostgreSQL, SQLite, MongoDB

AI & APIs: Google Gemini API, Google Maps API, Groq API, Prompt Engineering (Basic)

Currently Learning: Data Structures & Algorithms, Spring Boot

EDUCATION

B.E. Information Technology

Don Bosco Institute of Technology, Mumbai

Currently Pursuing

Diploma in Electronics & Telecommunication

St. Xavier's Technical Institute, Mahim

Completed 2025 | Grade: Distinction

EXPERIENCE

Computer Hardware & Software Intern

Addiction Computers, Mumbai

Dec 2024 – Apr 2025

- Diagnosed and resolved hardware and software faults across PCs and laptops, performing component-level repair and replacement.
- Assisted with day-to-day hardware/software maintenance for customer systems, building a strong practical foundation in computer systems troubleshooting.

ACHIEVEMENTS

Certification: **Certificate of Achievement — Advanced Cybersecurity Concepts Bootcamp**, DSCI Advanced Cyber Skill Centre, Mumbai — Two-Day Bootcamp (August 2026).

Award: **3rd Prize — InnoQuest 2025–2026**, Don Bosco Institute of Technology — Project: "Brick By Brick: The Real Estate Reality" (31 October 2025).

- Google Solution Challenge / Build with AI — Certificate of Participation.
- Hackarena 2.0, Ignite Room (Zonal Round) — Certificate of Participation.

SOFT SKILLS & LANGUAGES

Soft Skills: Adaptability, Problem Solving, Communication, Team Collaboration, Continuous Learning

Languages: English, Hindi, Tamil, Marathi (Passive)
